

# WHY ALUMINUM AND NOT WOOD?

Aluminum surfaces require no seasonal maintenance work and offer everyone a highly durable and decorative solution in the living environment. Deck surfaces, Pergolas, Fences, Wall coverings – All of these can be seen more and more in home yards over the years. They provide us with shade, protection, privacy and, of course, design & beauty to match the architectural style of the house. They are normally made of wood or iron, but recently there has been an increase in demand for their production to be made from aluminum.

## FEATURES

Does not rust or swell.

Recyclable & Environmentally Sustainable.

Impervious to damage from pests such as termites.

Includes lifetime warranty against water and pests.

Does not require maintenance.

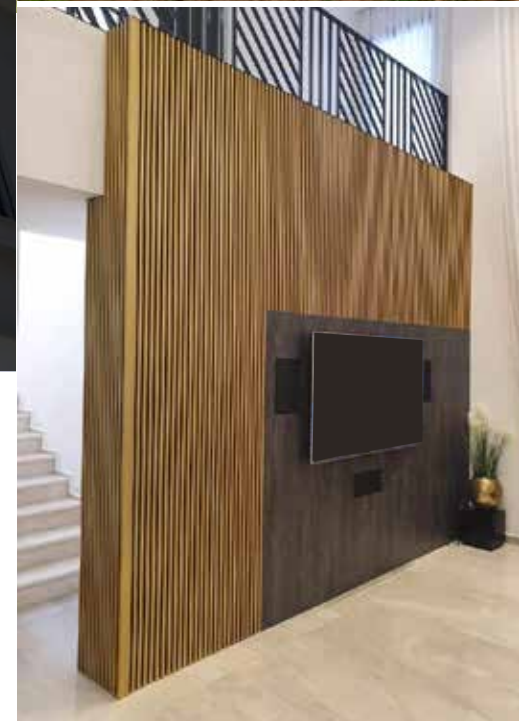

Variety of color and texture including wood & iron.

Fire-resistant.

Easy to assemble, saving time & labor.
